Re: **Former Nextel Communications, Inc. Upper 700 MHz Guard Band Licenses and Revisions to Part 27 of the Commission's Rules, WT Docket No. 06-169; The Development of Operational Technical and Spectrum Requirements for Meeting Federal, State and Local Public Safety Communication Requirements Through the Year 2010, WT Docket No. 96-86.**

Dear Ms. Dortch:

On 16 November 2006, Ken Budka, Tewfik Doumi and I, on behalf of Lucent Technologies, met with Michael Wilhelm, Zenni Nakazawa, Tom Eng, and John Evanoff of the Federal Communications Commission's (Commission) Public Safety and Homeland Security Bureau. Also, in attendance were Tim Magwire and Paul Moon from the Commission's Wireless Telecommunications Bureau. The purpose of the meeting was to discuss, reiterate and affirm Lucent's position in the above referenced proceedings.

Lucent continues to support the need for a broadband-only 6 MHz broadband block in the 700 MHz public safety spectrum space. In addition, we believe that there is broad consensus among commenters in the Guard Band proceeding that the benefits of a 6+6 band plan greatly outweigh both the costs associated with reprogramming existing radio equipment and any challenges relating to international coordination issues. Further substance of the discussion is set forth in the attached handout.

In accordance with Section 1.1206(b)(2) of the Commission's rules, this letter is being filed electronically with your office. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

Michael T. McMenamin
